New Inmarsat Portable ISatPhone Pro The Sat Phone goal posts have moved!!!

For most travellers and campers, satellite phones have been considered a luxury, with handsets costing several thousand dollars, hefty call-costs, a binding contract, and monthly fees.

But the goal posts have moved with Inmarsat's new ISatPhone Pro.

Inmarsat is the major world carrier for satellite phones. Because they use a fixed satellite network with satellites orbiting at 36000Km above the earth's surface, they are now on a par with the satellite television providers, in terms of coverage and reliability. Better still, with Inmarsat's upgrade to their new Series 4 Satellite, they released a new *portable* hand-held satellite phone, which has predictably blitzed the market.

Previously, the competition's service had been low-orbiting satellites – only 200Km high and taking 80 minutes to circumnavigate the globe – with the result being patchy communication and call drop-outs, but not any longer: Inmarsat's satellite service is parked permanently over Northern Australia, meaning your phone antenna will need point north from most Australian locations – and your reception? Crystal clear with quick acquisition time from the moment you turn it on.

But is it affordable? Yes.

- The cost of a handset was launched at well under \$1000 in stead of the \$2-3000 previously. Even with to-days falling exchange the ISatPhone Pro ticks all the boxes with our specially-priced bundle.
- This bundle includes an ISatPhone, a carry-case, SIM card and SIM card activation), which means that when you receive your satellite phone, it's good to go.
- We also sell prepaid phone credit vouchers for 25, 50, 100 for 250 units (with one-unit being the equivalent of one minute call-time, calculated in 15-second increments).
- Unlike other plans – **there is no flagfall**. You can TXT or send concise, SMS-style email to any mobile or email address in the world.
- You can receive a TXT or email just as easily, even if your phone is turned off, as both texts and emails are held in the 'Cloud' and will arrive in your phone once you switch it back on.
- There is also no charge for incoming emails and SMS messages sent to your ISatPhone.

Now about the handset:

The IsatPhone Pro is Inmarsat's first global handheld satellite phone. Designed for professionals, IsatPhone Pro offers satellite telephony, with Bluetooth for hands-free use, voicemail, and text and email messaging. Location data is also available to the user to look up or send in a text message. It is available on a global basis over the three Inmarsat-4 satellites, which have an operational lifetime well into the 2020s.

Inmarsat's ISatPhone is the only satellite phone to support Bluetooth. The handset can be placed on its side for easy, hands-free use and there is full manoeuvrability of the antenna. The handset is simple to use: it has an intuitive GSM-style interface; a high-visibility colour screen and a larger keypad for easy dialling.

Included with the ISatPhone:

- Mains universal AC charger with (4 international adaptors)
- Car charger – 10-32 volts
- PC charger – micro USB cable
- Wired hands free headset
- Wrist strap
- Quick start guide (8 languages)
- Warranty documentation
- Support CD
- Also available Carry case (included with the Campersat pack)
- Purpose built

ISatPhone Pro has been optimised to deliver the best performance over the world's most advanced mobile satellite network. It is available on a global basis over the three Inmarsat-4 satellites, which have an operational lifetime into the 2020s.

Features:

- Global coverage
- Robust handset
- Clear voice quality
- Reliable network connection
- Long battery life
- Voice Mail
- Text
- E-mail Messaging
- Easy to use

When you are in the middle of nowhere you don't want your link to home in the hands of a PO box.

GPS Location data can also be viewed and sent in a text message. Its unique design – including a fully manoeuvrable antenna – allows the handset to be placed on its side for easy hands-free use via Bluetooth.

"With the introduction of IsatPhone Pro, any Australian working in remote locations or interested in travel and outdoor pursuits can have that peace of mind for less than the cost of international mobile phone roaming."

This means the IsatPhone Pro is a 'game changer' in the remote environment market, offering the longest battery life, the most robust handset, reliable global coverage, clear voice quality and ease of use at the most competitive price point in the market. Up to eight hours talk time and up to 100 hours on Standby – the longest battery life in the market.

The phone is dust, splash and shock resistant, with an Ingress protection rating of IP54.

It is also capable of operating at the widest temperature range, from -20°C to +55°C.

Why do you need it?

The IsatPhone Pro has been built from the ground up by Inmarsat, an industry world leader in satellite voice and data communications. The intuitive GSM-style interface and high visibility colour screen along with unmatched inbuilt features like Bluetooth and GPS keep you in touch wherever you are.

Campersat with its 30 years experience in looking after free campers is your number one choice.
